250,000 FCFA (Online, in-house)
350,000 FCFA On-Campus incl
breakfast and lunch

Executive Summary

Operational risks span every aspect of the enterprise and operational risk management (ORM) is a vital function to identify, quantify, strategize, and act to avoid, mitigate, and control risks.

Operational risk management, given the catastrophic consequences of risks, should be a strategic function with representation from all the essential functions and business units. Even among well-run companies, ORM remains a weak link. There is a lot of confusion about operational risk as it is a relatively nascent discipline and the origins and popularity are far from certain.

Risk, as they say, is not just risk managers' job. It is everyone's job.

Learning Objectives

As a result of completing this course, all participants will improve their knowledge, understanding and analytical skills for risks management, with the following benefits:

1. Gain an understanding of risk and its dynamics.
2. Examine external risks and how they can impact your organisation.
3. Identify key risk in your organisation.
4. Learn tools and techniques to measure and monitor control effectiveness.
5. Identify key management processes required in your organisation.
6. How to communicate key risks to and with senior management teams and stakeholders.
7. Obtain feedback from industry leaders.
8. Create a tailored action plan for your organisation.
